

Wood & Bamboo Edges

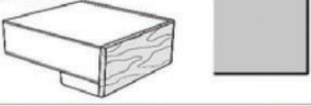

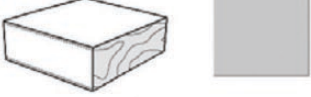

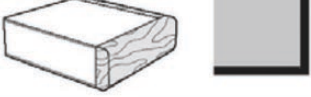

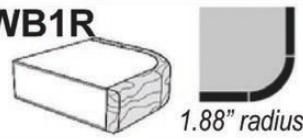

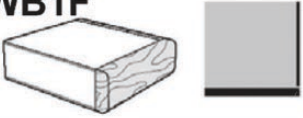

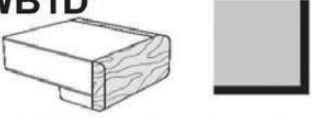

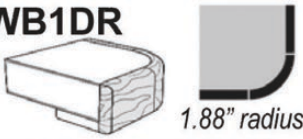

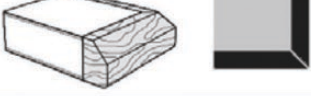

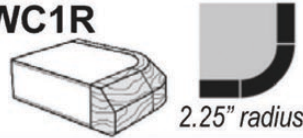

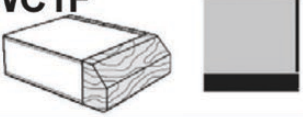

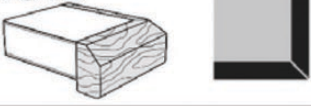

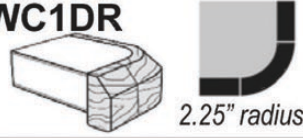

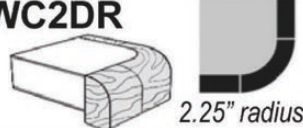

Premium Solid Wood or Bamboo* Edges with Extremely Durable Catalyzed Lacquer Finish

“Basic” corner detail is square or with a slight outer radius as indicated. The joints are mitered, with the exception of W2M, WA3, WB1, WB1D, which are butt-jointed. Primary profile is applied to all edges.

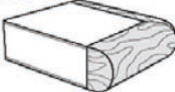

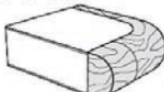

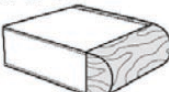

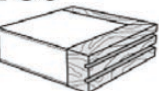

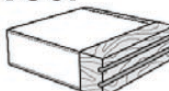

“Radius” corner detail (suffix “R”) has an outer radius as indicated. Primary profile is applied to all edges.

“Flat Side” corner detail (suffix “F”) is square, with primary profile applied to user edge, and flat wood edgeband applied to non-user edges as follows: W2E on non-user edge for training table tops, and WA3 on non-user edge for worksurfaces.

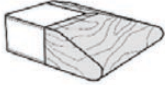

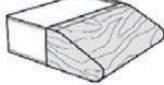

*Bamboo is not available with drop profiles or W2E, W2ED and WA3 profiles
